## PROFILE

I'm a Web Designer and Front-end Developer. Born in Brazil. Based in Nord Italy.

Experienced in front-end development with HTML, CSS and JavaScript.

I'm currently studying JavaScript and React.js. Reading about Digital Marketing, SEO, Open Source Tools and Creative Coding. Lots to learn.

My area of work for the last few years has been customer service and experience. But as everything changes, so did I and I decided to look for my dream job in the field I love.

I also use WordPress, WooCommerce and many other great Open Source and affordable technologies to help people have a more tech-friendly approach and help companies and small business owners grow.

I'm looking for entry-level positions.
